安装

稳定版: v1.9.4

Node 版本支持: ^4.8.0 || ^5.7.0 || ^6.2.2 || >=8.0.0

在使用 Yarn 之前,首先要在您的系统上安装 Yarn。 以下列出了多种不同的安装方式,并且新的安装方式仍在继续添加:

操作系统:	CentOS / Fedora / RHEL	•
版本:	稳定版 (1.9.4)	•

CentOS / Fedora / RHEL

On CentOS, Fedora and RHEL, you can install Yarn via our RPM package repository.

```
curl --silent --location https://dl.yarnpkg.com/rpm/yarn.repo | sudo tee
/etc/yum.repos.d/yarn.repo
```

If you do not already have Node.js installed, you should also configure the NodeSource repository:

```
curl --silent --location https://rpm.nodesource.com/setup_8.x | sudo bash -
```

Then you can simply:

```
sudo yum install yarn
## OR ##
sudo dnf install yarn
```

通过如下命令测试 Yarn 是否安装成功:

```
yarn --version
```
